

# EXTERIOR VENUE SERIES

The Exterior Venue Series is the most innovative and complete outdoor rated power distribution available to the event services industry. All models are UL Listed for USA & Canada as NEMA 3R devices. AC Power Distribution's EV Series is made up of several categories, each with numerous configurations, all designed to work seamlessly together. Thus giving endless power distribution solutions to the event professional with the least amount of equipment. The EV Series allows your distribution system to expand as your needs change and grow.

Pin & Sleeve Distribution Center with Edison GFCI Distribution

Camlock Load Centers can power various distribution centers.

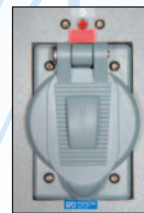

Mini-Cam Distribution Center with Twistlock Distribution

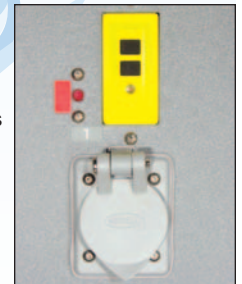

- ▶ UL Listed by Underwriter Labs, not a 3rd party testing house.
- ▶ Rugged chassis design is strong & compact with a durable outdoor powder coat finish.
- ▶ Flow-Thru design keeps all feeder & branch circuits in the same direction, eliminating cable clutter.

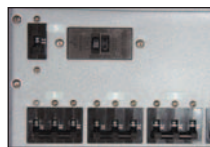

Fully stackable frames with tie off points. Large models are available with an optional rolling "Truck-Pack" frame.

GFCI protection is standard on all 20amp Edison outlets and courtesy receptacles.

Breakers are located behind rugged weatherproof doors, clearly marked and accessible. No flimsy plastic breaker covers to break.

Angled receptacles help to reduce strain on cable & connector.

All receptacles, including camlocks, have self-closing weatherproof flip covers.

- ▶ Stainless steel hardware.
- ▶ Quality components.
- ▶ IEC certified 65K AIC mains.
- ▶ 100% rated, hydraulic breakers for all branch circuits (10K AIC).
- ▶ 1year Limited Warranty

Recessed neon indicator lights for easy "power on" indication.
